

IAN MANAGUELOD

Full Stack Developer

09157796065 | managuelodian@gmail.com

PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience building scalable web applications, mobile apps, and REST APIs using Python (FastAPI, Flask, Django), JavaScript (React, React Native, Next.js), Node.js, and PHP (Laravel). Specialized in AI automation and conversational AI, integrating Retell AI, OpenAI GPT, and Claude for intelligent voice agents and AI-powered solutions. Proficient in workflow automation platforms (n8n, Zapier, Make.com) and cloud-native development on AWS, Azure, and GCP with CI/CD pipelines. Experienced in RAG systems, vector databases (Pinecone), Model Context Protocol (MCP), and modern frontend frameworks. Strong expertise in PostgreSQL, MongoDB, and Supabase. Adept at building AI-driven applications, mentoring teams, and driving innovation in agile environments.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, PHP, C# .NET, HTML, CSS

Backend Frameworks: FastAPI, Flask, Django, Node.js, Laravel, Odoo

Frontend Frameworks & Libraries: React, React Native, Next.js, Bootstrap, jQuery

Databases: PostgreSQL, MongoDB, Supabase, Cosmos DB, Azure DB

Cloud Platforms: AWS (Lambda, CodePipeline, IAM, Cognito, Rekognition, Polly, CloudWatch), Azure (DevOps, ARM templates, App Services), GCP (Cloud Run, Cloud Build)

AI & Machine Learning: OpenAI GPT, Claude, Claude Pro, Retell AI, RAG systems, Pinecone, Model Context Protocol (MCP)

Workflow Automation: n8n, Zapier, Make.com

DevOps & CI/CD: Docker, GitHub Actions, Azure DevOps, AWS CodePipeline, Git (GitHub, GitLab, Bitbucket)

Development Tools: Cursor, Windsurf, Dev0, Vercel

Security & Authentication: JWT, OAuth2.0, RBAC, AWS IAM, Cognito

Monitoring & Observability: Prometheus, Grafana, CloudWatch, Power BI

Third-Party Integrations: Microsoft Dynamics 365, Discourse, Dialpad, Remine, Crexi, Stripe

PROFESSIONAL EXPERIENCE

Note: Freelance positions listed below are project-based engagements

Freelance Full Stack Developer & AI Automation

Mindfortress | October 2025 – Present (Project-based)

- Created 4 full-stack websites with a team of 3: mindfortress.com, textlands.com, agentpik.com, and parentglue.com
- Developed [Callivate.ai](https://callivate.ai), an AI-powered workforce solution for automotive dealerships with 8 specialized AI agents handling sales, service, parts, finance, and reception departments 24/7
- Built comprehensive automation workflows using n8n, Zapier, and Make.com to integrate AI voice agents (Retell AI) with SMS, payment processing, and CRM systems for Callivate.ai
- Implemented Supabase for secure data storage with end-to-end encryption, VIN lookup, email extraction, and real-time synchronization for automotive dealership operations

- Developed React Native mobile application (nules app) for Netherlands market, implementing cross-platform mobile solutions with native performance
- Built scalable backend services using Node.js and Python, designing RESTful APIs and microservices architecture for high-performance applications
- Integrated Retell AI agent for intelligent conversational interfaces and voice interactions, enabling AI agents to handle complex customer inquiries and multi-department transfers
- Collaborated with cross-functional team of 3 developers, following agile methodologies to deliver production-ready applications

Freelance Full Stack Developer

SEnw Realty | Feb 2025 – Sept 2025 (Project-based)

- Developed senw.io, a PHP Laravel 8 website with AI-powered live chat assistant using Python and LLMs (OpenAI GPT) for real-time property lead assistance
- Built Discourse forum and Next.js CRM system on Vercel with Supabase, designing scalable REST APIs with FastAPI/Laravel integrating multiple APIs (Dialpad, Remine, Crexi, Stripe)
- Implemented n8n workflow automation for CRM lead management, automatically capturing leads from website forms, Remine, and other sources, enriching data, and creating contacts/deals in CRM with territory-based routing
- Automated lead processing pipeline using n8n to sync lead statuses, trigger notifications, schedule follow-ups, and integrate with downstream systems for seamless lead-to-deal conversion
- Implemented RAG pipeline with Pinecone using advanced prompt engineering, deployed with GitHub Actions and Docker on Google Cloud Run

Freelance Full Stack Developer and AI & Multi Platform

FIDE | December 2024 – Feb 2025 (Project-based)

- Led AI project building intelligent customer support system with Model Context Protocol (MCP) servers using Python, enabling AI-driven Supabase schema generation
- Built containerized MCP Inspector tool with FastAPI for real-time testing and validation, improving debugging efficiency
- Implemented n8n and Make.com automation workflows to integrate MCP servers with external systems, automating data synchronization, API calls, and workflow orchestration
- Designed automated pipelines using n8n and Make.com to connect MCP servers with databases, notification systems, and third-party services for seamless AI-driven operations
- Implemented RAG pipeline with Pinecone and LLMs, automating ticket categorization and deploying to Google Cloud Run with CI/CD

Freelance MS365 Consultant & Python Developer

Clinical Solutions | August 2024 – November 2024 (Project-based)

- Developed Python automation solutions for Microsoft Dynamics 365, building secure REST APIs with FastAPI integrated with AWS Lambda
- Implemented CI/CD pipelines with AWS CodePipeline, automating deployments and version control for efficient releases
- Utilized AWS IAM and Cognito for secure access management, applying SOLID principles and CloudWatch for observability

Assistant Manager, Digital Systems Development Officer

EastWest Bank | March 2022 – September 2023

- Led Python-based AI development including facial recognition for credit card applications and AI-powered CSR system using AWS AI services (Rekognition, Polly)
- Designed scalable REST APIs with FastAPI and PostgreSQL, implementing JWT/OAuth2.0 authentication and SOLID principles

- Automated CI/CD with AWS CodePipeline and Lambda, improving release efficiency by 20% and ensuring compliance with CloudWatch/Prometheus observability

Python Developer

David James Development Company | 2020 – 2021

- Developed customized Odoo applications for international clients, building scalable REST APIs with FastAPI and PostgreSQL, improving performance by 25%
- Implemented CI/CD pipelines with Azure DevOps and ARM templates, automating deployments for Odoo and Python projects
- Led Agile pair programming, applying SOLID principles and JWT authentication, improving delivery efficiency by 25%

Technical Lead (Promoted from Software Engineer)

RBT Consulting Corporation | 2019 – 2020

- Led enterprise application development using Odoo and Python, integrating REST APIs with PostgreSQL for HRIS/Payroll systems serving 30+ clients
- Designed scalable REST APIs with SOLID principles and JWT authentication, reducing maintenance costs by 15% and release cycles by 20%
- Provisioned Azure cloud infrastructure with ARM templates and CI/CD pipelines, implementing observability with Prometheus and Grafana

EDUCATION

STI College Recto | Bachelor's in IT | 2014-2018

Espiritu Santo Parochial School | High School | 2009-2013
